

**07/12/09 - GSoC, week 7: give me a few more days, and you will see...**

Yes, I know, it's been a while since my last post, and today, too, I cannot say so much about the code: the open dialog is on its way, and a good milestone in the project is just behind the corner, but it's exam session here at Politecnico and it's been hard to find some good time to code in the last two weeks...

Anyway, tomorrow I'll have another exam, and the last of the summer session is waiting for me on the 20th, and then it will be only SoC! And I promise to achieve that milestone next week, so expect a screencast coming, stay tuned!
